

Dock made of 2 floats, one 6x12 feet & one 6x8 feet, connected to shore with a 6x4 foot connector, of which 3 feet extends beyond the shoreline, which, in turn, is connected to a 6x4 foot platform on the shore. The total length of the dock from the shoreline is 21 feet (3 + 12 + 6 feet). Mooring eyes will be placed on each side of the dock and will be tethered to mooring stakes at the shoreline as shown.
