INTRODUCTION
During the later part of 2014, Albemarle County Department of Social Services developed a new strategic approach for the next three years. The strategy and the plan are designed to provide direction for prioritizing future initiatives, allocating limited resources, and charting a path for growth. The Strategic Plan assists the leadership and the staff in focusing their efforts on services that are relevant to the community, to individuals, and to families.

The Department’s Strategic Plan is meant to guide strategic and operational actions of the organization as we seek to address current and future needs of our customers and our community. It sets direction for the organization and the type of service delivery system we seek to develop. It will be used as a guide to help in strategic and operational decision making. However, the strategic plan is not a detailed operational plan, nor does it contain specific budget recommendations. Instead, it presents a vision for the future of the organization and strategies for achieving that future.

Strategic Planning Assumptions that Guided the Discussions
An analysis of the region’s economic and demographic data informed the dialogue during the planning meetings that led to the creation of the strategic priorities captured in this document and helped to frame the following assumptions that drove the discussions:

- Collaborative strategies are needed to reduce/prevent impacts of poverty.
- Communication and community engagement with diverse cultures and populations must increase.
- Expanding caseloads require us to work smarter, more effectively and more efficiently to ensure results.
- Technology maximization will help to make processes (both internal and external) more efficient and should also be used as a tool to expand how we communicate.

Strategic Imperatives Identified
The analysis of strengths, weaknesses, opportunities and threats led to the identification of strategic imperatives that, if not addressed, may hinder the organization’s ability to be positioned to thrive into the future. These imperatives are to:

- Collaborate with community partners to increase capacity.
- Continue to create organizational ability and agility to be responsive to customer expectations.
- Ensure staff has the competencies required to create a quality customer experience.

This plan and set of strategic priorities, goals and strategies are meant to become the methodology for the organization’s operations. If it is successful, this process will not have yielded a plan to be placed on the shelf, but will have served as a catalyst for the process of planning strategically at all times and at all levels throughout the organization.

It is our hope that this plan captures the new environment expected to exist in a rapidly evolving world. We will continuously assess our purpose, promote and reward innovation and improvement, foster employee development, and use effective methods and technologies to produce significant positive results and lasting benefits for our community and the customers served by the Department of Social Services in Albemarle County.
