This project is of significant value to the County as it brings in a rural community, Emerald Ridge, with many work at home and students in the proposed service area. In addition, this project will include bringing broadband to Mint Springs Park – providing first responders better access in case of emergency.
The lower section of the Yancey Mills project (Burchs Creek Rd, Mitchell Ln, Midway Rd) is a significant area where broadband access has been requested. This is also close to several schools. Providing broadband in this area is certain to increase property values.
The Tillman’s project is of significant value to the southern section of Albemarle (Esmont) – the western side of Esmont has many agribusiness opportunities and many requests for broadband through our surveys.
