1. Does the conceptual design for Crozet Avenue and Main Street achieve the Master Plan's vision while respecting the needs of property and business owners along Crozet Avenue?  
*See Question #2 as an opportunity to provide specific comments about strengths and weaknesses.*
2. What do you see as the positives or negatives about the conceptual design for Crozet Avenue? Please be specific about ways that you think the design reinforces the concept of a pedestrian-friendly downtown or areas that you think should be improved in the design.
3. Are there any specific concerns you have about the phasing and implementation of this design for the streetscape?
4. Please provide overall feedback on the public process to date and your expectations as we move into the design and construction phase of this project.

Please submit your comments before leaving or return to Jack Kelsey by December 17, 2007:
