

New Crozet Library Schematic Design Comment Sheet *Please Share your Thoughts!*

Schematic Design: First phase in the design of a project where an architect/engineer prepares diagrams giving a general view of the components and scale of the project.

The schematic design shows how the needs and desires of the community, balanced with other factors such as the budget, site and general library requirements translate into a vibrant community library structure for downtown Crozet. The Crozet Library Steering Committee, a Board-appointed committee comprised of citizens, elected officials, County staff and library professionals, has been leading the process for the development of the schematic design.

As this first phase of the design process nears completion, your feedback on the schematic design is extremely important to the project. Your comments will be passed on to the Board of Supervisors when this design is presented to them in March.

Please return your comments by Friday, February 27, 2009.

1) Please provide your comments on the following areas of the schematic design:

- Floor plan

- Exterior façades

- Site plan

- Relationship to the streets

2) Please share your ideas or concerns for initial uses for the first floor, before the library needs the space for expansion:

3) Please share any additional suggestions, likes/dislikes, concerns (use back of sheet if necessary):

Please mail or fax to: Ron Lilley, Office of Facilities Development, Albemarle County Government, 401 McIntire Road, Charlottesville, VA 22902, Fax number 434-972-4091. Or email rlilley@albemarle.org.
