

Additional Web Comments about Re-use of the Old Crozet School as of 6/25/08

20.	Thank you for the opportunity to comment on the Crozet school reuse. Our family lives up the street on St. George Avenue. We would love to see a flexible use community center for classes, exercise, art and music, with much of the open space preserved for walking and exploring. Thank you!	6/21/2008 8:53:00 AM
21.	Hello, Crozet Elementary School has served the children in the Crozet area for many years. Four of my children attended from Kindergarten through the 5th grade. It only seems equitable now that the school should serve the elderly and the disabled low income residents of Crozet. My suggestion is that the school be converted into small rental apartments. The school is ideally situated to be convenient for residents to frequent the downtown area of Crozet without the need for a vehicle, again a major concern today. A good example of an elementary school turned into rental housing can be found in Nelson County at the Ryan School. This was a very successful project and provided rental housing to a particular group of citizens that could not afford to live elsewhere. Thank you for allowing public comment.	6/21/2008 1:36:00 PM
22.	I think that a wonderful idea for the old school would be to use the classrooms for studios for artists and artisans in the area, similar to what they have done with the McGuffey Center in Charlottesville. It could also become a permanent home for the Crozet Arts Festival and COmmittee.	6/21/2008 3:57:00 PM
23.	I attended the workshop and the voting session on Saturday, but I wanted to give a little more feedback regarding the choices. The predominant "winner" in my mind was the Community Center rendition. It incorporated most of the uses that I believe will benefit the Crozet Community. However, I did want to put my 2 cents worth in for really trying to include the Recycling Center into this version as it nears the final work-up for the report. I also really believe that inclusion of the skate park would definitely benefit the youth and wold like to see it in the Community Center version as well, if at all possible. Thanks for all the hard work you're doing and for asking for the input from the community!	6/23/2008 5:33:00 PM
24.	I think that the Murray high school is too small for the amount of students enrolled. Crozet School would be a natural choice to relocate or supplement Murray High. When it is not being used as a school, Why not create a teen center to provide something for our children to do after school?	6/24/2008 12:33:00 PM
