The Places29 Master Plan: Ten Important Facts

1. **Places29 is one of five master plans for the County’s Development Areas.** It covers the four urban areas along US 29 that are north of the City of Charlottesville: Neighborhood 1, Neighborhood 2, the Community of Hollymead, and the Community of Piney Mountain. The Plan recognizes that almost one-quarter of the County’s residents live in this area, and it is one of the County’s main commercial, retail, and employment areas.

2. Based on existing development and expected future growth, the **Plan coordinates land use and transportation** so that homes and businesses are well-served by roads, transit, and community facilities. The Plan also establishes priorities for the location of public investments and to guide land use decisionmaking.

3. **Places29 recommends a comprehensive, regional, multimodal transportation network.** The network includes improvements on US 29, grade-separated intersections that minimize ramps, and a system of roads that are parallel and perpendicular to US 29. The parallel and perpendicular roads will give local traffic a choice of routes—all trips won’t have to be on US 29. Offering local traffic alternative routes will make it easier for regional traffic to move through the US 29 Corridor more quickly and safely. The transportation network is also multimodal, which means that people will have a choice of driving, walking, bicycling, or using transit to reach their destination.

4. **With or without a Places29 Master Plan, there is a backlog of needed transportation improvements** due to growth that has occurred and can be anticipated based on existing plans and project approvals. However, development in accordance with the Plan’s coordination of land uses and transportation may ultimately allow some of the road improvements to be postponed or even avoided.

5. **Future needs for schools, libraries, parks, and other community facilities have been included** in the Master Plan.

6. **The Master Plan preserves open space, provides connections to existing County parks, and encourages provision of amenities** in Centers and Neighborhoods.

7. **The Places29 Master Plan is a Vision Plan.** The Plan’s Future Land Use Map shows the community’s ultimate future vision for the area. It will be decades before the area is completely built out and fulfills the vision. Every five years, the County will review and update the Master Plan to revalidate the vision, see how far we’ve come, and determine what else needs to be included in the implementation program.

8. **The list of implementation projects in the Master Plan lays out the initial steps necessary to move towards the ultimate vision.** These implementation initiatives are
planned to take place over the next 20 years, although economic and funding conditions may affect the timing. But even if the transportation improvements and other community facilities are limited, delayed, or not constructed, the Places29 area will still benefit from development of the pattern of mixed land uses, walkable neighborhoods, and transportation options recommended in the Plan.

9. **While road improvements and the access management program may change the way some properties are accessed, Places29 calls for minimal disruption of existing businesses,** provides opportunities for redevelopment as property owners feel market conditions warrant, and increases business vitality by improving access for vehicles, pedestrians, bicyclists, and transit riders.

10. It is important to recognize that **this Master Plan does not change the zoning of property.** Individual properties continue to be regulated under the zoning that exists on their property. The Master Plan does provide policy direction should changes to current zoning be sought and general guidance for future development.

**Copies of the draft Places29 Master Plan are available for review at:**
- The Northside Library—ask at the reference desk
- The Community Development Lobby in the County Office Building

The Plan is also on the County’s Places29 website: [www.albemarle.org/places29](http://www.albemarle.org/places29)

A limited number of paper copies of the Plan are available for $56.00 (necessary to cover the costs of copying), please call the Community Development Dept. at (434) 296-5832 and ask the receptionist about a copy.

CDs with the complete Plan are available at no charge. Contact the receptionist as for a hard copy.

For questions or further information about the Master Plan, please contact:
Judy Wiegand, (434) 296-5832, x. 3438 or jwiegand@albemarle.org

**To sign up for Places29 e-news from A-mail:** [www.albemarle.org/amail](http://www.albemarle.org/amail)

**Next Steps:**
- September 8 and 10  Public open houses
- October  Planning Commission Public Hearing on Places29
- November  Planning Commission recommendation to the Board of Supervisors

After the Planning Commission makes a recommendation on the Places29 Master Plan, the Plan is forwarded to the Board of Supervisors for consideration.

**Watch for future A-mails about specific dates, times, and places for these next steps.**

The Places29 Master Plan: Ten Important Facts

1. **Places29 is one of five master plans for the County’s Development Areas.** It covers the four urban areas along US 29 that are north of the City of Charlottesville: Neighborhood 1, Neighborhood 2, the Community of Hollymead, and the Community of Piney Mountain. The Plan recognizes that almost one-quarter of the County’s residents live in this area, and it is one of the County’s main commercial, retail, and employment areas.

2. Based on existing development and expected future growth, **the Plan coordinates land use and transportation** so that homes and businesses are well-served by roads, transit, and community facilities. The Plan also establishes priorities for the location of public investments and to guide land use decisionmaking.

3. **Places29 recommends a comprehensive, regional, multimodal transportation network.** The network includes improvements on US 29, grade-separated intersections that minimize ramps, and a system of roads that are parallel and perpendicular to US 29. The parallel and perpendicular roads will give local traffic a choice of routes—all trips won’t have to be on US 29. Offering local traffic alternative routes will make it easier for regional traffic to move through the US 29 Corridor more quickly and safely. The transportation network is also multimodal, which means that people will have a choice of driving, walking, bicycling, or using transit to reach their destination.

4. **With or without a Places29 Master Plan, there is a backlog of needed transportation improvements** due to growth that has occurred and can be anticipated based on existing plans and project approvals. However, development in accordance with the Plan’s coordination of land uses and transportation may ultimately allow some of the road improvements to be postponed or even avoided.

5. **Future needs for schools, libraries, parks, and other community facilities have been included** in the Master Plan.

6. **The Master Plan preserves open space, provides connections to existing County parks, and encourages provision of amenities** in Centers and Neighborhoods.

7. **The Places29 Master Plan is a Vision Plan.** The Plan’s Future Land Use Map shows the community’s ultimate future vision for the area. It will be decades before the area is completely built out and fulfills the vision. Every five years, the County will review and update the Master Plan to revalidate the vision, see how far we’ve come, and determine what else needs to be included in the implementation program.

8. **The list of implementation projects in the Master Plan lays out the initial steps necessary to move towards the ultimate vision.** These implementation initiatives are
planned to take place over the next 20 years, although economic and funding conditions may affect the timing. But even if the transportation improvements and other community facilities are limited, delayed, or not constructed, the Places29 area will still benefit from development of the pattern of mixed land uses, walkable neighborhoods, and transportation options recommended in the Plan.

9. **While road improvements and the access management program may change the way some properties are accessed, Places29 calls for minimal disruption of existing businesses**, provides opportunities for redevelopment as property owners feel market conditions warrant, and increases business vitality by improving access for vehicles, pedestrians, bicyclists, and transit riders.

10. It is important to recognize that **this Master Plan does not change the zoning of property**. Individual properties continue to be regulated under the zoning that exists on their property. The Master Plan does provide policy direction should changes to current zoning be sought and general guidance for future development.

**Copies of the draft Places29 Master Plan are available for review at:**
- The Northside Library—ask at the reference desk
- The Community Development Lobby in the County Office Building

The Plan is also on the County’s Places29 website: [www.albemarle.org/places29](http://www.albemarle.org/places29)

A limited number of paper copies of the Plan are available for $56.00 (necessary to cover the costs of copying), please call the Community Development Dept. at (434) 296-5832 and ask the receptionist about a copy.

CDs with the complete Plan are available at no charge. Contact the receptionist as for a hard copy.

For questions or further information about the Master Plan, please contact:
Judy Wiegand, (434) 296-5832, x. 3438 or [jwiegand@albemarle.org](mailto:jwiegand@albemarle.org)

**To sign up for Places29 e-news from A-mail:** [www.albemarle.org/amail](http://www.albemarle.org/amail)

**Next Steps:**
- September 8 and 10 — Public open houses
- October — Planning Commission Public Hearing on Places29
- November — Planning Commission recommendation to the Board of Supervisors

After the Planning Commission makes a recommendation on the Places29 Master Plan, the Plan is forwarded to the Board of Supervisors for consideration.

The Plan recognizes that almost one-quarter of the County’s residents live in this area, and it is one of the County’s main commercial, retail, and employment areas.

2. Based on existing development and expected future growth, **the Plan coordinates land use and transportation** so that homes and businesses are well-served by roads, transit, and community facilities. The Plan also establishes priorities for the location of public investments and to guide land use decisionmaking.

3. **Places29 recommends a comprehensive, regional, multimodal transportation network.** The network includes improvements on US 29, grade-separated intersections that minimize ramps, and a system of roads that are parallel and perpendicular to US 29. The parallel and perpendicular roads will give local traffic a choice of routes—all trips won’t have to be on US 29. Offering local traffic alternative routes will make it easier for regional traffic to move through the US 29 Corridor more quickly and safely. The transportation network is also multimodal, which means that people will have a choice of driving, walking, bicycling, or using transit to reach their destination.

4. **With or without a Places29 Master Plan, there is a backlog of needed transportation improvements** due to growth that has occurred and can be anticipated based on existing plans and project approvals. However, development in accordance with the Plan’s coordination of land uses and transportation may ultimately allow some of the road improvements to be postponed or even avoided.

5. **Future needs for schools, libraries, parks, and other community facilities have been included** in the Master Plan.

6. **The Master Plan preserves open space, provides connections to existing County parks, and encourages provision of amenities** in Centers and Neighborhoods.

7. **The Places29 Master Plan is a Vision Plan.** The Plan’s Future Land Use Map shows the community’s ultimate future vision for the area. It will be decades before the area is completely built out and fulfills the vision. Every five years, the County will review and update the Master Plan to revalidate the vision, see how far we’ve come, and determine what else needs to be included in the implementation program.

8. **The list of implementation projects in the Master Plan lays out the initial steps necessary to move towards the ultimate vision.** These implementation initiatives are
planned to take place over the next 20 years, although economic and funding conditions may affect the timing. But even if the transportation improvements and other community facilities are limited, delayed, or not constructed, the Places29 area will still benefit from development of the pattern of mixed land uses, walkable neighborhoods, and transportation options recommended in the Plan.

9. **While road improvements and the access management program may change the way some properties are accessed, Places29 calls for minimal disruption of existing businesses,** provides opportunities for redevelopment as property owners feel market conditions warrant, and increases business vitality by improving access for vehicles, pedestrians, bicyclists, and transit riders.

10. It is important to recognize that **this Master Plan does not change the zoning of property.** Individual properties continue to be regulated under the zoning that exists on their property. The Master Plan does provide policy direction should changes to current zoning be sought and general guidance for future development.

**Copies of the draft Places29 Master Plan are available for review at:**
- The Northside Library—ask at the reference desk
- The Community Development Lobby in the County Office Building

The Plan is also on the County’s Places29 website: [www.albemarle.org/places29](http://www.albemarle.org/places29)

A limited number of paper copies of the Plan are available for $56.00 (necessary to cover the costs of copying), please call the Community Development Dept. at (434) 296-5832 and ask the receptionist about a copy.

CDs with the complete Plan are available at no charge. Contact the receptionist as for a hard copy.

For questions or further information about the Master Plan, please contact:
Judy Wiegand, (434) 296-5832, x. 3438 or [jwiegand@albemarle.org](mailto:jwiegand@albemarle.org)

**To sign up for Places29 e-news from A-mail:** [www.albemarle.org/amil](http://www.albemarle.org/amil)

**Next Steps:**
- **September 8 and 10** Public open houses
- **October** Planning Commission Public Hearing on Places29
- **November** Planning Commission recommendation to the Board of Supervisors

After the Planning Commission makes a recommendation on the Places29 Master Plan, the Plan is forwarded to the Board of Supervisors for consideration.

**Watch for future A-mails about specific dates, times, and places for these next steps.**
The Places29 Master Plan: Ten Important Facts

1. **Places29 is one of five master plans for the County’s Development Areas.** It covers the four urban areas along US 29 that are north of the City of Charlottesville: Neighborhood 1, Neighborhood 2, the Community of Hollymead, and the Community of Piney Mountain. The Plan recognizes that almost one-quarter of the County’s residents live in this area, and it is one of the County’s main commercial, retail, and employment areas.

2. Based on existing development and expected future growth, **the Plan coordinates land use and transportation** so that homes and businesses are well-served by roads, transit, and community facilities. The Plan also establishes priorities for the location of public investments and to guide land use decisionmaking.

3. **Places29 recommends a comprehensive, regional, multimodal transportation network.** The network includes improvements on US 29, grade-separated intersections that minimize ramps, and a system of roads that are parallel and perpendicular to US 29. The parallel and perpendicular roads will give local traffic a choice of routes—all trips won’t have to be on US 29. Offering local traffic alternative routes will make it easier for regional traffic to move through the US 29 Corridor more quickly and safely. The transportation network is also multimodal, which means that people will have a choice of driving, walking, bicycling, or using transit to reach their destination.

The Plan recognizes that almost one-quarter of the County’s residents live in this area, and it is one of the County’s main commercial, retail, and employment areas.

2. Based on existing development and expected future growth, **the Plan coordinates land use and transportation** so that homes and businesses are well-served by roads, transit, and community facilities. The Plan also establishes priorities for the location of public investments and to guide land use decisionmaking.

3. **Places29 recommends a comprehensive, regional, multimodal transportation network.** The network includes improvements on US 29, grade-separated intersections that minimize ramps, and a system of roads that are parallel and perpendicular to US 29. The parallel and perpendicular roads will give local traffic a choice of routes—all trips won’t have to be on US 29. Offering local traffic alternative routes will make it easier for regional traffic to move through the US 29 Corridor more quickly and safely. The transportation network is also multimodal, which means that people will have a choice of driving, walking, bicycling, or using transit to reach their destination.

4. **With or without a Places29 Master Plan, there is a backlog of needed transportation improvements** due to growth that has occurred and can be anticipated based on existing plans and project approvals. However, development in accordance with the Plan’s coordination of land uses and transportation may ultimately allow some of the road improvements to be postponed or even avoided.

5. **Future needs for schools, libraries, parks, and other community facilities have been included** in the Master Plan.

6. **The Master Plan preserves open space, provides connections to existing County parks, and encourages provision of amenities** in Centers and Neighborhoods.

7. **The Places29 Master Plan is a Vision Plan.** The Plan’s Future Land Use Map shows the community’s ultimate future vision for the area. It will be decades before the area is completely built out and fulfills the vision. Every five years, the County will review and update the Master Plan to revalidate the vision, see how far we’ve come, and determine what else needs to be included in the implementation program.

8. **The list of implementation projects in the Master Plan lays out the initial steps necessary to move towards the ultimate vision.** These implementation initiatives are
planned to take place over the next 20 years, although economic and funding conditions may affect the timing. But even if the transportation improvements and other community facilities are limited, delayed, or not constructed, the Places29 area will still benefit from development of the pattern of mixed land uses, walkable neighborhoods, and transportation options recommended in the Plan.

9. **While road improvements and the access management program may change the way some properties are accessed, Places29 calls for minimal disruption of existing businesses,** provides opportunities for redevelopment as property owners feel market conditions warrant, and increases business vitality by improving access for vehicles, pedestrians, bicyclists, and transit riders.

10. It is important to recognize that **this Master Plan does not change the zoning of property.** Individual properties continue to be regulated under the zoning that exists on their property. The Master Plan does provide policy direction should changes to current zoning be sought and general guidance for future development.

**Copies of the draft Places29 Master Plan are available for review at:**
- The Northside Library—ask at the reference desk
- The Community Development Lobby in the County Office Building

The Plan is also on the County’s Places29 website: [www.albemarle.org/places29](http://www.albemarle.org/places29)

A limited number of paper copies of the Plan are available for $56.00 (necessary to cover the costs of copying), please call the Community Development Dept. at (434) 296-5832 and ask the receptionist about a copy.

CDs with the complete Plan are available at no charge. Contact the receptionist as for a hard copy.

For questions or further information about the Master Plan, please contact: Judy Wiegand, (434) 296-5832, x. 3438 or jwiegand@albemarle.org

**To sign up for Places29 e-news from A-mail:** [www.albemarle.org/amail](http://www.albemarle.org/amail)

**Next Steps:**
- **September 8 and 10** Public open houses
- **October** Planning Commission Public Hearing on Places29
- **November** Planning Commission recommendation to the Board of Supervisors

After the Planning Commission makes a recommendation on the Places29 Master Plan, the Plan is forwarded to the Board of Supervisors for consideration.

**Watch for future A-mails about specific dates, times, and places for these next steps.**
The Places29 Master Plan: Ten Important Facts

1. **Places29 is one of five master plans for the County’s Development Areas.** It covers the four urban areas along US 29 that are north of the City of Charlottesville: Neighborhood 1, Neighborhood 2, the Community of Hollymead, and the Community of Piney Mountain. The Plan recognizes that almost one-quarter of the County’s residents live in this area, and it is one of the County’s main commercial, retail, and employment areas.

2. Based on existing development and expected future growth, the Plan coordinates land use and transportation so that homes and businesses are well-served by roads, transit, and community facilities. The Plan also establishes priorities for the location of public investments and to guide land use decisionmaking.

3. **Places29 recommends a comprehensive, regional, multimodal transportation network.** The network includes improvements on US 29, grade-separated intersections that minimize ramps, and a system of roads that are parallel and perpendicular to US 29. The parallel and perpendicular roads will give local traffic a choice of routes—all trips won’t have to be on US 29. Offering local traffic alternative routes will make it easier for regional traffic to move through the US 29 Corridor more quickly and safely. The transportation network is also multimodal, which means that people will have a choice of driving, walking, bicycling, or using transit to reach their destination.

4. **With or without a Places29 Master Plan, there is a backlog of needed transportation improvements** due to growth that has occurred and can be anticipated based on existing plans and project approvals. However, development in accordance with the Plan’s coordination of land uses and transportation may ultimately allow some of the road improvements to be postponed or even avoided.

5. **Future needs for schools, libraries, parks, and other community facilities have been included** in the Master Plan.

6. **The Master Plan preserves open space, provides connections to existing County parks, and encourages provision of amenities** in Centers and Neighborhoods.

The Places29 Master Plan: Ten Important Facts

1. **Places29 is one of five master plans for the County’s Development Areas.** It covers the four urban areas along US 29 that are north of the City of Charlottesville: Neighborhood 1, Neighborhood 2, the Community of Hollymead, and the Community of Piney Mountain. The Plan recognizes that almost one-quarter of the County’s residents live in this area, and it is one of the County’s main commercial, retail, and employment areas.

2. Based on existing development and expected future growth, the Plan **coordinates land use and transportation** so that homes and businesses are well-served by roads, transit, and community facilities. The Plan also establishes priorities for the location of public investments and to guide land use decisionmaking.

3. **Places29 recommends a comprehensive, regional, multimodal transportation network.** The network includes improvements on US 29, grade-separated intersections that minimize ramps, and a system of roads that are parallel and perpendicular to US 29. The parallel and perpendicular roads will give local traffic a choice of routes—all trips won’t have to be on US 29. Offering local traffic alternative routes will make it easier for regional traffic to move through the US 29 Corridor more quickly and safely. The transportation network is also multimodal, which means that people will have a choice of driving, walking, bicycling, or using transit to reach their destination.

4. **With or without a Places29 Master Plan, there is a backlog of needed transportation improvements** due to growth that has occurred and can be anticipated based on existing plans and project approvals. However, development in accordance with the Plan’s coordination of land uses and transportation may ultimately allow some of the road improvements to be postponed or even avoided.

5. **Future needs for schools, libraries, parks, and other community facilities have been included** in the Master Plan.

6. **The Master Plan preserves open space, provides connections to existing County parks, and encourages provision of amenities** in Centers and Neighborhoods.

7. **The Places29 Master Plan is a Vision Plan.** The Plan’s Future Land Use Map shows the community’s ultimate future vision for the area. It will be decades before the area is completely built out and fulfills the vision. Every five years, the County will review and update the Master Plan to revalidate the vision, see how far we’ve come, and determine what else needs to be included in the implementation program.

8. **The list of implementation projects in the Master Plan lays out the initial steps necessary to move towards the ultimate vision.** These implementation initiatives are
planned to take place over the next 20 years, although economic and funding conditions may affect the timing. But even if the transportation improvements and other community facilities are limited, delayed, or not constructed, the Places29 area will still benefit from development of the pattern of mixed land uses, walkable neighborhoods, and transportation options recommended in the Plan.

9. While road improvements and the access management program may change the way some properties are accessed, Places29 calls for minimal disruption of existing businesses, provides opportunities for redevelopment as property owners feel market conditions warrant, and increases business vitality by improving access for vehicles, pedestrians, bicyclists, and transit riders.

10. It is important to recognize that this Master Plan does not change the zoning of property. Individual properties continue to be regulated under the zoning that exists on their property. The Master Plan does provide policy direction should changes to current zoning be sought and general guidance for future development.

2. **Based on existing development and expected future growth,** the Plan coordinates land use and transportation so that homes and businesses are well-served by roads, transit, and community facilities. The Plan also establishes priorities for the location of public investments and to guide land use decisionmaking.

3. **Places29 recommends a comprehensive, regional, multimodal transportation network.** The network includes improvements on US 29, grade-separated intersections that minimize ramps, and a system of roads that are parallel and perpendicular to US 29. The parallel and perpendicular roads will give local traffic a choice of routes—all trips won’t have to be on US 29. Offering local traffic alternative routes will make it easier for regional traffic to move through the US 29 Corridor more quickly and safely. The transportation network is also multimodal, which means that people will have a choice of driving, walking, bicycling, or using transit to reach their destination.

4. **With or without a Places29 Master Plan, there is a backlog of needed transportation improvements** due to growth that has occurred and can be anticipated based on existing plans and project approvals. However, development in accordance with the Plan’s coordination of land uses and transportation may ultimately allow some of the road improvements to be postponed or even avoided.

5. **Future needs for schools, libraries, parks, and other community facilities have been included** in the Master Plan.

6. **The Master Plan preserves open space, provides connections to existing County parks, and encourages provision of amenities** in Centers and Neighborhoods.

7. **The Places29 Master Plan is a Vision Plan.** The Plan’s Future Land Use Map shows the community’s ultimate future vision for the area. It will be decades before the area is completely built out and fulfills the vision. Every five years, the County will review and update the Master Plan to revalidate the vision, see how far we’ve come, and determine what else needs to be included in the implementation program.

8. **The list of implementation projects in the Master Plan lays out the initial steps necessary to move towards the ultimate vision.** These implementation initiatives are
planned to take place over the next 20 years, although economic and funding conditions may affect the timing. But even if the transportation improvements and other community facilities are limited, delayed, or not constructed, the Places29 area will still benefit from development of the pattern of mixed land uses, walkable neighborhoods, and transportation options recommended in the Plan.

9. **While road improvements and the access management program may change the way some properties are accessed, Places29 calls for minimal disruption of existing businesses**, provides opportunities for redevelopment as property owners feel market conditions warrant, and increases business vitality by improving access for vehicles, pedestrians, bicyclists, and transit riders.

10. It is important to recognize that **this Master Plan does not change the zoning of property**. Individual properties continue to be regulated under the zoning that exists on their property. The Master Plan does provide policy direction should changes to current zoning be sought and general guidance for future development.

**Copies of the draft Places29 Master Plan are available for review at:**
- The Northside Library—ask at the reference desk
- The Community Development Lobby in the County Office Building

The Plan is also on the County’s Places29 website: [www.albemarle.org/places29](http://www.albemarle.org/places29)

A limited number of paper copies of the Plan are available for $56.00 (necessary to cover the costs of copying), please call the Community Development Dept. at (434) 296-5832 and ask the receptionist about a copy.

CDs with the complete Plan are available at no charge. Contact the receptionist as for a hard copy.

For questions or further information about the Master Plan, please contact:
Judy Wiegand, (434) 296-5832, x. 3438 or jwiegand@albemarle.org

**To sign up for Places29 e-news from A-mail:** [www.albemarle.org/amail](http://www.albemarle.org/amail)

**Next Steps:**
- September 8 and 10: Public open houses
- October: Planning Commission Public Hearing on Places29
- November: Planning Commission recommendation to the Board of Supervisors

After the Planning Commission makes a recommendation on the Places29 Master Plan, the Plan is forwarded to the Board of Supervisors for consideration.

**Watch for future A-mails about specific dates, times, and places for these next steps.**
The Places29 Master Plan: Ten Important Facts

1. **Places29 is one of five master plans for the County’s Development Areas.** It covers the four urban areas along US 29 that are north of the City of Charlottesville: Neighborhood 1, Neighborhood 2, the Community of Hollymead, and the Community of Piney Mountain. The Plan recognizes that almost one-quarter of the County’s residents live in this area, and it is one of the County’s main commercial, retail, and employment areas.

2. Based on existing development and expected future growth, **the Plan coordinates land use and transportation** so that homes and businesses are well-served by roads, transit, and community facilities. The Plan also establishes priorities for the location of public investments and to guide land use decisionmaking.

3. **Places29 recommends a comprehensive, regional, multimodal transportation network.** The network includes improvements on US 29, grade-separated intersections that minimize ramps, and a system of roads that are parallel and perpendicular to US 29. The parallel and perpendicular roads will give local traffic a choice of routes—all trips won’t have to be on US 29. Offering local traffic alternative routes will make it easier for regional traffic to move through the US 29 Corridor more quickly and safely. The transportation network is also multimodal, which means that people will have a choice of driving, walking, bicycling, or using transit to reach their destination.

4. **With or without a Places29 Master Plan, there is a backlog of needed transportation improvements** due to growth that has occurred and can be anticipated based on existing plans and project approvals. However, development in accordance with the Plan’s coordination of land uses and transportation may ultimately allow some of the road improvements to be postponed or even avoided.

5. **Future needs for schools, libraries, parks, and other community facilities have been included** in the Master Plan.

6. **The Master Plan preserves open space, provides connections to existing County parks, and encourages provision of amenities** in Centers and Neighborhoods.

7. **The Places29 Master Plan is a Vision Plan.** The Plan’s Future Land Use Map shows the community’s ultimate future vision for the area. Based on existing development and expected future growth, **the Plan coordinates land use and transportation** so that homes and businesses are well-served by roads, transit, and community facilities. The Plan also establishes priorities for the location of public investments and to guide land use decisionmaking.

3. **Places29 recommends a comprehensive, regional, multimodal transportation network.** The network includes improvements on US 29, grade-separated intersections that minimize ramps, and a system of roads that are parallel and perpendicular to US 29. The parallel and perpendicular roads will give local traffic a choice of routes—all trips won’t have to be on US 29. Offering local traffic alternative routes will make it easier for regional traffic to move through the US 29 Corridor more quickly and safely. The transportation network is also multimodal, which means that people will have a choice of driving, walking, bicycling, or using transit to reach their destination.

4. **With or without a Places29 Master Plan, there is a backlog of needed transportation improvements** due to growth that has occurred and can be anticipated based on existing plans and project approvals. However, development in accordance with the Plan’s coordination of land uses and transportation may ultimately allow some of the road improvements to be postponed or even avoided.

5. **Future needs for schools, libraries, parks, and other community facilities have been included** in the Master Plan.

6. **The Master Plan preserves open space, provides connections to existing County parks, and encourages provision of amenities** in Centers and Neighborhoods.

7. **The Places29 Master Plan is a Vision Plan.** The Plan’s Future Land Use Map shows the community’s ultimate future vision for the area. It will be decades before the area is completely built out and fulfills the vision. Every five years, the County will review and update the Master Plan to revalidate the vision, see how far we’ve come, and determine what else needs to be included in the implementation program.

8. **The list of implementation projects in the Master Plan lays out the initial steps necessary to move towards the ultimate vision.** These implementation initiatives are
planned to take place over the next 20 years, although economic and funding conditions may affect the timing. But even if the transportation improvements and other community facilities are limited, delayed, or not constructed, the Places29 area will still benefit from development of the pattern of mixed land uses, walkable neighborhoods, and transportation options recommended in the Plan.

9. **While road improvements and the access management program may change the way some properties are accessed, Places29 calls for minimal disruption of existing businesses**, provides opportunities for redevelopment as property owners feel market conditions warrant, and increases business vitality by improving access for vehicles, pedestrians, bicyclists, and transit riders.

10. It is important to recognize that **this Master Plan does not change the zoning of property**. Individual properties continue to be regulated under the zoning that exists on their property. The Master Plan does provide policy direction should changes to current zoning be sought and general guidance for future development.

**Copies of the draft Places29 Master Plan are available for review at:**
- The Northside Library—ask at the reference desk
- The Community Development Lobby in the County Office Building

The Plan is also on the County’s Places29 website: [www.albemarle.org/places29](http://www.albemarle.org/places29)

A limited number of paper copies of the Plan are available for $56.00 (necessary to cover the costs of copying), please call the Community Development Dept. at (434) 296-5832 and ask the receptionist about a copy.

CDs with the complete Plan are available at no charge. Contact the receptionist as for a hard copy.

For questions or further information about the Master Plan, please contact:
Judy Wiegand, (434) 296-5832, x. 3438 or [jwiegand@albemarle.org](mailto:jwiegand@albemarle.org)

**To sign up for Places29 e-news from A-mail:** [www.albemarle.org/amil](http://www.albemarle.org/amil)

**Next Steps:**
- **September 8 and 10** Public open houses
- **October** Planning Commission Public Hearing on Places29
- **November** Planning Commission recommendation to the Board of Supervisors

After the Planning Commission makes a recommendation on the Places29 Master Plan, the Plan is forwarded to the Board of Supervisors for consideration.

**Watch for future A-mails about specific dates, times, and places for these next steps.**
The Places29 Master Plan: Ten Important Facts

1. **Places29 is one of five master plans for the County’s Development Areas.** It covers the four urban areas along US 29 that are north of the City of Charlottesville: Neighborhood 1, Neighborhood 2, the Community of Hollymead, and the Community of Piney Mountain. The Plan recognizes that almost one-quarter of the County’s residents live in this area, and it is one of the County’s main commercial, retail, and employment areas.

2. Based on existing development and expected future growth, **the Plan coordinates land use and transportation** so that homes and businesses are well-served by roads, transit, and community facilities. The Plan also establishes priorities for the location of public investments and to guide land use decisionmaking.

3. **Places29 recommends a comprehensive, regional, multimodal transportation network.** The network includes improvements on US 29, grade-separated intersections that minimize ramps, and a system of roads that are parallel and perpendicular to US 29. The parallel and perpendicular roads will give local traffic a choice of routes—all trips won’t have to be on US 29. Offering local traffic alternative routes will make it easier for regional traffic to move through the US 29 Corridor more quickly and safely. The transportation network is also multimodal, which means that people will have a choice of driving, walking, bicycling, or using transit to reach their destination.

4. **With or without a Places29 Master Plan, there is a backlog of needed transportation improvements** due to growth that has occurred and can be anticipated based on existing plans and project approvals. However, development in accordance with the Plan’s coordination of land uses and transportation may ultimately allow some of the road improvements to be postponed or even avoided.

Based on existing development and expected future growth, **the Plan coordinates land use and transportation** so that homes and businesses are well-served by roads, transit, and community facilities. The Plan also establishes priorities for the location of public investments and to guide land use decisionmaking.

3. **Places29 recommends a comprehensive, regional, multimodal transportation network.** The network includes improvements on US 29, grade-separated intersections that minimize ramps, and a system of roads that are parallel and perpendicular to US 29. The parallel and perpendicular roads will give local traffic a choice of routes—all trips won’t have to be on US 29. Offering local traffic alternative routes will make it easier for regional traffic to move through the US 29 Corridor more quickly and safely. The transportation network is also multimodal, which means that people will have a choice of driving, walking, bicycling, or using transit to reach their destination.

4. **With or without a Places29 Master Plan, there is a backlog of needed transportation improvements** due to growth that has occurred and can be anticipated based on existing plans and project approvals. However, development in accordance with the Plan’s coordination of land uses and transportation may ultimately allow some of the road improvements to be postponed or even avoided.

5. **Future needs for schools, libraries, parks, and other community facilities have been included** in the Master Plan.

6. **The Master Plan preserves open space, provides connections to existing County parks, and encourages provision of amenities** in Centers and Neighborhoods.

7. **The Places29 Master Plan is a Vision Plan.** The Plan’s Future Land Use Map shows the community’s ultimate future vision for the area. It will be decades before the area is completely built out and fulfills the vision. Every five years, the County will review and update the Master Plan to revalidate the vision, see how far we’ve come, and determine what else needs to be included in the implementation program.

8. **The list of implementation projects in the Master Plan lays out the initial steps necessary to move towards the ultimate vision.** These implementation initiatives are
planned to take place over the next 20 years, although economic and funding conditions may affect the timing. But even if the transportation improvements and other community facilities are limited, delayed, or not constructed, the Places29 area will still benefit from development of the pattern of mixed land uses, walkable neighborhoods, and transportation options recommended in the Plan.

9. **While road improvements and the access management program may change the way some properties are accessed, Places29 calls for minimal disruption of existing businesses**, provides opportunities for redevelopment as property owners feel market conditions warrant, and increases business vitality by improving access for vehicles, pedestrians, bicyclists, and transit riders.

10. It is important to recognize that **this Master Plan does not change the zoning of property**. Individual properties continue to be regulated under the zoning that exists on their property. The Master Plan does provide policy direction should changes to current zoning be sought and general guidance for future development.

**Copies of the draft Places29 Master Plan are available for review at:**
- The Northside Library—ask at the reference desk
- The Community Development Lobby in the County Office Building

The Plan is also on the County’s Places29 website: [www.albemarle.org/places29](http://www.albemarle.org/places29)

A limited number of paper copies of the Plan are available for $56.00 (necessary to cover the costs of copying), please call the Community Development Dept. at (434) 296-5832 and ask the receptionist about a copy.

CDs with the complete Plan are available at no charge. Contact the receptionist as for a hard copy.

For questions or further information about the Master Plan, please contact:
Judy Wiegand, (434) 296-5832, x. 3438 or jwiegand@albemarle.org

**To sign up for Places29 e-news from A-mail:** [www.albemarle.org/amail](http://www.albemarle.org/amail)

**Next Steps:**
- September 8 and 10: Public open houses
- October: Planning Commission Public Hearing on Places29
- November: Planning Commission recommendation to the Board of Supervisors

After the Planning Commission makes a recommendation on the Places29 Master Plan, the Plan is forwarded to the Board of Supervisors for consideration.

**Watch for future A-mails about specific dates, times, and places for these next steps.**
The Places29 Master Plan: Ten Important Facts

1. **Places29 is one of five master plans for the County’s Development Areas.** It covers the four urban areas along US 29 that are north of the City of Charlottesville: Neighborhood 1, Neighborhood 2, the Community of Hollymead, and the Community of Piney Mountain. The Plan recognizes that almost one-quarter of the County’s residents live in this area, and it is one of the County’s main commercial, retail, and employment areas.

2. Based on existing development and expected future growth, the Plan coordinates land use and transportation so that homes and businesses are well-served by roads, transit, and community facilities. The Plan also establishes priorities for the location of public investments and to guide land use decisionmaking.

3. **Places29 recommends a comprehensive, regional, multimodal transportation network.** The network includes improvements on US 29, grade-separated intersections that minimize ramps, and a system of roads that are parallel and perpendicular to US 29. The parallel and perpendicular roads will give local traffic a choice of routes—all trips won’t have to be on US 29. Offering local traffic alternative routes will make it easier for regional traffic to move through the US 29 Corridor more quickly and safely. The transportation network is also multimodal, which means that people will have a choice of driving, walking, bicycling, or using transit to reach their destination.

4. **With or without a Places29 Master Plan, there is a backlog of needed transportation improvements** due to growth that has occurred and can be anticipated based on existing plans and project approvals. However, development in accordance with the Plan’s coordination of land uses and transportation may ultimately allow some of the road improvements to be postponed or even avoided.

5. **Future needs for schools, libraries, parks, and other community facilities have been included** in the Master Plan.

6. The Master Plan preserves open space, provides connections to existing County parks, and encourages provision of amenities in Centers and Neighborhoods.

7. **The Places29 Master Plan is a Vision Plan.** The Plan’s Future Land Use Map shows the community’s ultimate future vision for the area. Based on existing development and expected future growth, **the Plan coordinates land use and transportation** so that homes and businesses are well-served by roads, transit, and community facilities. The Plan also establishes priorities for the location of public investments and to guide land use decisionmaking.

3. **Places29 recommends a comprehensive, regional, multimodal transportation network.** The network includes improvements on US 29, grade-separated intersections that minimize ramps, and a system of roads that are parallel and perpendicular to US 29. The parallel and perpendicular roads will give local traffic a choice of routes—all trips won’t have to be on US 29. Offering local traffic alternative routes will make it easier for regional traffic to move through the US 29 Corridor more quickly and safely. The transportation network is also multimodal, which means that people will have a choice of driving, walking, bicycling, or using transit to reach their destination.

4. **With or without a Places29 Master Plan, there is a backlog of needed transportation improvements** due to growth that has occurred and can be anticipated based on existing plans and project approvals. However, development in accordance with the Plan’s coordination of land uses and transportation may ultimately allow some of the road improvements to be postponed or even avoided.

5. **Future needs for schools, libraries, parks, and other community facilities have been included** in the Master Plan.

6. **The Master Plan preserves open space, provides connections to existing County parks, and encourages provision of amenities** in Centers and Neighborhoods.

7. **The Places29 Master Plan is a Vision Plan.** The Plan’s Future Land Use Map shows the community’s ultimate future vision for the area. It will be decades before the area is completely built out and fulfills the vision. Every five years, the County will review and update the Master Plan to revalidate the vision, see how far we’ve come, and determine what else needs to be included in the implementation program.

8. **The list of implementation projects in the Master Plan lays out the initial steps necessary to move towards the ultimate vision.** These implementation initiatives are
planned to take place over the next 20 years, although economic and funding conditions may affect the timing. But even if the transportation improvements and other community facilities are limited, delayed, or not constructed, the Places29 area will still benefit from development of the pattern of mixed land uses, walkable neighborhoods, and transportation options recommended in the Plan.

9. While road improvements and the access management program may change the way some properties are accessed, Places29 calls for minimal disruption of existing businesses, provides opportunities for redevelopment as property owners feel market conditions warrant, and increases business vitality by improving access for vehicles, pedestrians, bicyclists, and transit riders.

10. It is important to recognize that this Master Plan does not change the zoning of property. Individual properties continue to be regulated under the zoning that exists on their property. The Master Plan does provide policy direction should changes to current zoning be sought and general guidance for future development.

Copies of the draft Places29 Master Plan are available for review at:
- The Northside Library—ask at the reference desk
- The Community Development Lobby in the County Office Building

The Plan is also on the County’s Places29 website: [www.albemarle.org/places29](http://www.albemarle.org/places29)

A limited number of paper copies of the Plan are available for $56.00 (necessary to cover the costs of copying), please call the Community Development Dept. at (434) 296-5832 and ask the receptionist about a copy.

CDs with the complete Plan are available at no charge. Contact the receptionist as for a hard copy.

For questions or further information about the Master Plan, please contact:
Judy Wiegand, (434) 296-5832, x. 3438 or [jwiegand@albemarle.org](mailto:jwiegand@albemarle.org)

To sign up for Places29 e-news from A-mail: [www.albemarle.org/ail](http://www.albemarle.org/ail)

**Next Steps:**
September 8 and 10 Public open houses
October Planning Commission Public Hearing on Places29
November Planning Commission recommendation to the Board of Supervisors

After the Planning Commission makes a recommendation on the Places29 Master Plan, the Plan is forwarded to the Board of Supervisors for consideration.

*Watch for future A-mails about specific dates, times, and places for these next steps.*
The Places29 Master Plan: Ten Important Facts

1. **Places29 is one of five master plans for the County’s Development Areas.** It covers the four urban areas along US 29 that are north of the City of Charlottesville: Neighborhood 1, Neighborhood 2, the Community of Hollymead, and the Community of Piney Mountain. The Plan recognizes that almost one-quarter of the County’s residents live in this area, and it is one of the County’s main commercial, retail, and employment areas.

2. Based on existing development and expected future growth, **the Plan coordinates land use and transportation** so that homes and businesses are well-served by roads, transit, and community facilities. The Plan also establishes priorities for the location of public investments and to guide land use decisionmaking.

3. **Places29 recommends a comprehensive, regional, multimodal transportation network.** The network includes improvements on US 29, grade-separated intersections that minimize ramps, and a system of roads that are parallel and perpendicular to US 29. The parallel and perpendicular roads will give local traffic a choice of routes—all trips won’t have to be on US 29. Offering local traffic alternative routes will make it easier for regional traffic to move through the US 29 Corridor more quickly and safely. The transportation network is also multimodal, which means that people will have a choice of driving, walking, bicycling, or using transit to reach their destination.

4. **With or without a Places29 Master Plan, there is a backlog of needed transportation improvements** due to growth that has occurred and can be anticipated based on existing plans and project approvals. However, development in accordance with the Plan’s coordination of land uses and transportation may ultimately allow some of the road improvements to be postponed or even avoided.

5. **Future needs for schools, libraries, parks, and other community facilities have been included** in the Master Plan.

6. **The Master Plan preserves open space, provides connections to existing County parks, and encourages provision of amenities** in Centers and Neighborhoods.

7. **The Places29 Master Plan is a Vision Plan.** The Plan’s Future Land Use Map shows the community’s ultimate future vision for the area. The Plan also establishes priorities for the location of public investments and to guide land use decisionmaking.

3. **Places29 recommends a comprehensive, regional, multimodal transportation network.** The network includes improvements on US 29, grade-separated intersections that minimize ramps, and a system of roads that are parallel and perpendicular to US 29. The parallel and perpendicular roads will give local traffic a choice of routes—all trips won’t have to be on US 29. Offering local traffic alternative routes will make it easier for regional traffic to move through the US 29 Corridor more quickly and safely. The transportation network is also multimodal, which means that people will have a choice of driving, walking, bicycling, or using transit to reach their destination.

4. **With or without a Places29 Master Plan, there is a backlog of needed transportation improvements** due to growth that has occurred and can be anticipated based on existing plans and project approvals. However, development in accordance with the Plan’s coordination of land uses and transportation may ultimately allow some of the road improvements to be postponed or even avoided.

5. **Future needs for schools, libraries, parks, and other community facilities have been included** in the Master Plan.

6. **The Master Plan preserves open space, provides connections to existing County parks, and encourages provision of amenities** in Centers and Neighborhoods.

7. **The Places29 Master Plan is a Vision Plan.** The Plan’s Future Land Use Map shows the community’s ultimate future vision for the area. It will be decades before the area is completely built out and fulfills the vision. Every five years, the County will review and update the Master Plan to revalidate the vision, see how far we’ve come, and determine what else needs to be included in the implementation program.

8. **The list of implementation projects in the Master Plan lays out the initial steps necessary to move towards the ultimate vision.** These implementation initiatives are
planned to take place over the next 20 years, although economic and funding conditions may affect the timing. But even if the transportation improvements and other community facilities are limited, delayed, or not constructed, the Places29 area will still benefit from development of the pattern of mixed land uses, walkable neighborhoods, and transportation options recommended in the Plan.

9. **While road improvements and the access management program may change the way some properties are accessed, Places29 calls for minimal disruption of existing businesses**, provides opportunities for redevelopment as property owners feel market conditions warrant, and increases business vitality by improving access for vehicles, pedestrians, bicyclists, and transit riders.

10. It is important to recognize that **this Master Plan does not change the zoning of property**. Individual properties continue to be regulated under the zoning that exists on their property. The Master Plan does provide policy direction should changes to current zoning be sought and general guidance for future development.

**Copies of the draft Places29 Master Plan are available for review at:**
- The Northside Library—ask at the reference desk
- The Community Development Lobby in the County Office Building

The Plan is also on the County's Places29 website: [www.albemarle.org/places29](http://www.albemarle.org/places29)

A limited number of paper copies of the Plan are available for $56.00 (necessary to cover the costs of copying), please call the Community Development Dept. at (434) 296-5832 and ask the receptionist about a copy.

CDs with the complete Plan are available at no charge. Contact the receptionist as for a hard copy.

For questions or further information about the Master Plan, please contact: Judy Wiegand, (434) 296-5832, x. 3438 or [jwiegand@albemarle.org](mailto:jwiegand@albemarle.org)

**To sign up for Places29 e-news from A-mail:** [www.albemarle.org/amail](http://www.albemarle.org/amail)

**Next Steps:**
- September 8 and 10: Public open houses
- October: Planning Commission Public Hearing on Places29
- November: Planning Commission recommendation to the Board of Supervisors

After the Planning Commission makes a recommendation on the Places29 Master Plan, the Plan is forwarded to the Board of Supervisors for consideration.

**Watch for future A-mails about specific dates, times, and places for these next steps.**
The Places29 Master Plan: Ten Important Facts

1. **Places29 is one of five master plans for the County’s Development Areas.** It covers the four urban areas along US 29 that are north of the City of Charlottesville: Neighborhood 1, Neighborhood 2, the Community of Hollymead, and the Community of Piney Mountain. The Plan recognizes that almost one-quarter of the County’s residents live in this area, and it is one of the County’s main commercial, retail, and employment areas.

2. Based on existing development and expected future growth, **the Plan coordinates land use and transportation** so that homes and businesses are well-served by roads, transit, and community facilities. The Plan also establishes priorities for the location of public investments and to guide land use decisionmaking.

3. **Places29 recommends a comprehensive, regional, multimodal transportation network.** The network includes improvements on US 29, grade-separated intersections that minimize ramps, and a system of roads that are parallel and perpendicular to US 29. The parallel and perpendicular roads will give local traffic a choice of routes—all trips won’t have to be on US 29. Offering local traffic alternative routes will make it easier for regional traffic to move through the US 29 Corridor more quickly and safely. The transportation network is also multimodal, which means that people will have a choice of driving, walking, bicycling, or using transit to reach their destination.

4. **With or without a Places29 Master Plan, there is a backlog of needed transportation improvements** due to growth that has occurred and can be anticipated based on existing plans and project approvals. However, development in accordance with the Plan’s coordination of land uses and transportation may ultimately allow some of the road improvements to be postponed or even avoided.

The parallel and perpendicular roads will give local traffic a choice of routes—all trips won’t have to be on US 29. Offering local traffic alternative routes will make it easier for regional traffic to move through the US 29 Corridor more quickly and safely. The transportation network is also multimodal, which means that people will have a choice of driving, walking, bicycling, or using transit to reach their destination.

4. **With or without a Places29 Master Plan, there is a backlog of needed transportation improvements** due to growth that has occurred and can be anticipated based on existing plans and project approvals. However, development in accordance with the Plan’s coordination of land uses and transportation may ultimately allow some of the road improvements to be postponed or even avoided.

5. **Future needs for schools, libraries, parks, and other community facilities have been included** in the Master Plan.

6. **The Master Plan preserves open space, provides connections to existing County parks, and encourages provision of amenities** in Centers and Neighborhoods.

7. **The Places29 Master Plan is a Vision Plan.** The Plan’s Future Land Use Map shows the community’s ultimate future vision for the area. It will be decades before the area is completely built out and fulfills the vision. Every five years, the County will review and update the Master Plan to revalidate the vision, see how far we’ve come, and determine what else needs to be included in the implementation program.

8. **The list of implementation projects in the Master Plan lays out the initial steps necessary to move towards the ultimate vision.** These implementation initiatives are
planned to take place over the next 20 years, although economic and funding conditions may affect the timing. But even if the transportation improvements and other community facilities are limited, delayed, or not constructed, the Places29 area will still benefit from development of the pattern of mixed land uses, walkable neighborhoods, and transportation options recommended in the Plan.

9. **While road improvements and the access management program may change the way some properties are accessed,** Places29 calls for minimal disruption of existing businesses, provides opportunities for redevelopment as property owners feel market conditions warrant, and increases business vitality by improving access for vehicles, pedestrians, bicyclists, and transit riders.

10. It is important to recognize that **this Master Plan does not change the zoning of property.** Individual properties continue to be regulated under the zoning that exists on their property. The Master Plan does provide policy direction should changes to current zoning be sought and general guidance for future development.

**Copies of the draft Places29 Master Plan are available for review at:**
- The Northside Library—ask at the reference desk
- The Community Development Lobby in the County Office Building

The Plan is also on the County’s Places29 website: [www.albemarle.org/places29](http://www.albemarle.org/places29)

A limited number of paper copies of the Plan are available for $56.00 (necessary to cover the costs of copying), please call the Community Development Dept. at (434) 296-5832 and ask the receptionist about a copy.

CDs with the complete Plan are available at no charge. Contact the receptionist as for a hard copy.

For questions or further information about the Master Plan, please contact:
Judy Wiegand, (434) 296-5832, x. 3438 or [jwiegand@albemarle.org](mailto:jwiegand@albemarle.org)

**To sign up for Places29 e-news from A-mail:** [www.albemarle.org/amail](http://www.albemarle.org/amail)

**Next Steps:**
- September 8 and 10: Public open houses
- October: Planning Commission Public Hearing on Places29
- November: Planning Commission recommendation to the Board of Supervisors

After the Planning Commission makes a recommendation on the Places29 Master Plan, the Plan is forwarded to the Board of Supervisors for consideration.

**Watch for future A-mails about specific dates, times, and places for these next steps.**
The Places29 Master Plan: Ten Important Facts

1. **Places29 is one of five master plans for the County’s Development Areas.** It covers the four urban areas along US 29 that are north of the City of Charlottesville: Neighborhood 1, Neighborhood 2, the Community of Hollymead, and the Community of Piney Mountain. The Plan recognizes that almost one-quarter of the County’s residents live in this area, and it is one of the County’s main commercial, retail, and employment areas.

2. Based on existing development and expected future growth, the Plan coordinates land use and transportation so that homes and businesses are well-served by roads, transit, and community facilities. The Plan also establishes priorities for the location of public investments and to guide land use decisionmaking.

3. **Places29 recommends a comprehensive, regional, multimodal transportation network.** The network includes improvements on US 29, grade-separated intersections that minimize ramps, and a system of roads that are parallel and perpendicular to US 29. The parallel and perpendicular roads will give local traffic a choice of routes—all trips won’t have to be on US 29. Offering local traffic alternative routes will make it easier for regional traffic to move through the US 29 Corridor more quickly and safely. The transportation network is also multimodal, which means that people will have a choice of driving, walking, bicycling, or using transit to reach their destination.

4. **With or without a Places29 Master Plan, there is a backlog of needed transportation improvements** due to growth that has occurred and can be anticipated based on existing plans and project approvals. However, development in accordance with the Plan’s coordination of land uses and transportation may ultimately allow some of the road improvements to be postponed or even avoided.

5. **Future needs for schools, libraries, parks, and other community facilities have been included** in the Master Plan.

6. **The Master Plan preserves open space, provides connections to existing County parks, and encourages provision of amenities** in Centers and Neighborhoods.

4. **With or without a Places29 Master Plan, there is a backlog of needed transportation improvements** due to growth that has occurred and can be anticipated based on existing plans and project approvals. However, development in accordance with the Plan’s coordination of land uses and transportation may ultimately allow some of the road improvements to be postponed or even avoided.

5. **Future needs for schools, libraries, parks, and other community facilities have been included** in the Master Plan.

6. **The Master Plan preserves open space, provides connections to existing County parks, and encourages provision of amenities** in Centers and Neighborhoods.

7. **The Places29 Master Plan is a Vision Plan.** The Plan’s Future Land Use Map shows the community’s ultimate future vision for the area. It will be decades before the area is completely built out and fulfills the vision. Every five years, the County will review and update the Master Plan to revalidate the vision, see how far we’ve come, and determine what else needs to be included in the implementation program.

8. **The list of implementation projects in the Master Plan lays out the initial steps necessary to move towards the ultimate vision.** These implementation initiatives are
planned to take place over the next 20 years, although economic and funding conditions may affect the timing. But even if the transportation improvements and other community facilities are limited, delayed, or not constructed, the Places29 area will still benefit from development of the pattern of mixed land uses, walkable neighborhoods, and transportation options recommended in the Plan.

9. While road improvements and the access management program may change the way some properties are accessed, Places29 calls for minimal disruption of existing businesses, provides opportunities for redevelopment as property owners feel market conditions warrant, and increases business vitality by improving access for vehicles, pedestrians, bicyclists, and transit riders.

10. It is important to recognize that this Master Plan does not change the zoning of property. Individual properties continue to be regulated under the zoning that exists on their property. The Master Plan does provide policy direction should changes to current zoning be sought and general guidance for future development.

Copies of the draft Places29 Master Plan are available for review at:
- The Northside Library—ask at the reference desk
- The Community Development Lobby in the County Office Building

The Plan is also on the County’s Places29 website: www.albemarle.org/places29

A limited number of paper copies of the Plan are available for $56.00 (necessary to cover the costs of copying), please call the Community Development Dept. at (434) 296-5832 and ask the receptionist about a copy.

CDs with the complete Plan are available at no charge. Contact the receptionist as for a hard copy.

For questions or further information about the Master Plan, please contact:
Judy Wiegand, (434) 296-5832, x. 3438 or jwiegand@albemarle.org

Next Steps:
September 8 and 10 Public open houses
October Planning Commission Public Hearing on Places29
November Planning Commission recommendation to the Board of Supervisors

After the Planning Commission makes a recommendation on the Places29 Master Plan, the Plan is forwarded to the Board of Supervisors for consideration.

Watch for future A-mails about specific dates, times, and places for these next steps.
The Places29 Master Plan: Ten Important Facts

1. **Places29 is one of five master plans for the County’s Development Areas.** It covers the four urban areas along US 29 that are north of the City of Charlottesville: Neighborhood 1, Neighborhood 2, the Community of Hollymead, and the Community of Piney Mountain. The Plan recognizes that almost one-quarter of the County’s residents live in this area, and it is one of the County’s main commercial, retail, and employment areas.

2. Based on existing development and expected future growth, **the Plan coordinates land use and transportation** so that homes and businesses are well-served by roads, transit, and community facilities. The Plan also establishes priorities for the location of public investments and to guide land use decisionmaking.

3. **Places29 recommends a comprehensive, regional, multimodal transportation network.** The network includes improvements on US 29, grade-separated intersections that minimize ramps, and a system of roads that are parallel and perpendicular to US 29. The parallel and perpendicular roads will give local traffic a choice of routes—all trips won’t have to be on US 29. Offering local traffic alternative routes will make it easier for regional traffic to move through the US 29 Corridor more quickly and safely. The transportation network is also multimodal, which means that people will have a choice of driving, walking, bicycling, or using transit to reach their destination.

4. **With or without a Places29 Master Plan, there is a backlog of needed transportation improvements** due to growth that has occurred and can be anticipated based on existing plans and project approvals. However, development in accordance with the Plan’s coordination of land uses and transportation may ultimately allow some of the road improvements to be postponed or even avoided.

5. **Future needs for schools, libraries, parks, and other community facilities have been included** in the Master Plan.

6. **The Master Plan preserves open space, provides connections to existing County parks, and encourages provision of amenities** in Centers and Neighborhoods.

7. **The Places29 Master Plan is a Vision Plan.** The Plan’s Future Land Use Map shows the community’s ultimate future vision for the area. The Places29 Master Plan: Ten Important Facts

1. **Places29 is one of five master plans for the County’s Development Areas.** It covers the four urban areas along US 29 that are north of the City of Charlottesville: Neighborhood 1, Neighborhood 2, the Community of Hollymead, and the Community of Piney Mountain. The Plan recognizes that almost one-quarter of the County’s residents live in this area, and it is one of the County’s main commercial, retail, and employment areas.

2. Based on existing development and expected future growth, **the Plan coordinates land use and transportation** so that homes and businesses are well-served by roads, transit, and community facilities. The Plan also establishes priorities for the location of public investments and to guide land use decisionmaking.

3. **Places29 recommends a comprehensive, regional, multimodal transportation network.** The network includes improvements on US 29, grade-separated intersections that minimize ramps, and a system of roads that are parallel and perpendicular to US 29. The parallel and perpendicular roads will give local traffic a choice of routes—all trips won’t have to be on US 29. Offering local traffic alternative routes will make it easier for regional traffic to move through the US 29 Corridor more quickly and safely. The transportation network is also multimodal, which means that people will have a choice of driving, walking, bicycling, or using transit to reach their destination.

4. **With or without a Places29 Master Plan, there is a backlog of needed transportation improvements** due to growth that has occurred and can be anticipated based on existing plans and project approvals. However, development in accordance with the Plan’s coordination of land uses and transportation may ultimately allow some of the road improvements to be postponed or even avoided.

5. **Future needs for schools, libraries, parks, and other community facilities have been included** in the Master Plan.

6. **The Master Plan preserves open space, provides connections to existing County parks, and encourages provision of amenities** in Centers and Neighborhoods.

7. **The Places29 Master Plan is a Vision Plan.** The Plan’s Future Land Use Map shows the community’s ultimate future vision for the area. It will be decades before the area is completely built out and fulfills the vision. Every five years, the County will review and update the Master Plan to revalidate the vision, see how far we’ve come, and determine what else needs to be included in the implementation program.

8. **The list of implementation projects in the Master Plan lays out the initial steps necessary to move towards the ultimate vision.** These implementation initiatives are
planned to take place over the next 20 years, although economic and funding conditions may affect the timing. But even if the transportation improvements and other community facilities are limited, delayed, or not constructed, the Places29 area will still benefit from development of the pattern of mixed land uses, walkable neighborhoods, and transportation options recommended in the Plan.

9. **While road improvements and the access management program may change the way some properties are accessed, Places29 calls for minimal disruption of existing businesses**, provides opportunities for redevelopment as property owners feel market conditions warrant, and increases business vitality by improving access for vehicles, pedestrians, bicyclists, and transit riders.

10. It is important to recognize that **this Master Plan does not change the zoning of property.** Individual properties continue to be regulated under the zoning that exists on their property. The Master Plan does provide policy direction should changes to current zoning be sought and general guidance for future development.

**Copies of the draft Places29 Master Plan are available for review at:**
- The Northside Library—ask at the reference desk
- The Community Development Lobby in the County Office Building

The Plan is also on the County’s Places29 website: [www.albemarle.org/places29](http://www.albemarle.org/places29)

A limited number of paper copies of the Plan are available for $56.00 (necessary to cover the costs of copying), please call the Community Development Dept. at (434) 296-5832 and ask the receptionist about a copy.

CDs with the complete Plan are available at no charge. Contact the receptionist as for a hard copy.

For questions or further information about the Master Plan, please contact:
Judy Wiegand, (434) 296-5832, x. 3438 or jwiegand@albemarle.org

**To sign up for Places29 e-news from A-mail:** [www.albemarle.org/amail](http://www.albemarle.org/amail)

**Next Steps:**
- **September 8 and 10** Public open houses
- **October** Planning Commission Public Hearing on Places29
- **November** Planning Commission recommendation to the Board of Supervisors

After the Planning Commission makes a recommendation on the Places29 Master Plan, the Plan is forwarded to the Board of Supervisors for consideration.

**Watch for future A-mails about specific dates, times, and places for these next steps.**
The Places29 Master Plan: Ten Important Facts

1. **Places29 is one of five master plans for the County’s Development Areas.** It covers the four urban areas along US 29 that are north of the City of Charlottesville: Neighborhood 1, Neighborhood 2, the Community of Hollymead, and the Community of Piney Mountain. The Plan recognizes that almost one-quarter of the County’s residents live in this area, and it is one of the County’s main commercial, retail, and employment areas.

2. Based on existing development and expected future growth, the Plan coordinates land use and transportation so that homes and businesses are well-served by roads, transit, and community facilities. The Plan also establishes priorities for the location of public investments and to guide land use decisionmaking.

3. **Places29 recommends a comprehensive, regional, multimodal transportation network.** The network includes improvements on US 29, grade-separated intersections that minimize ramps, and a system of roads that are parallel and perpendicular to US 29. The parallel and perpendicular roads will give local traffic a choice of routes—all trips won’t have to be on US 29. Offering local traffic alternative routes will make it easier for regional traffic to move through the US 29 Corridor more quickly and safely. The transportation network is also multimodal, which means that people will have a choice of driving, walking, bicycling, or using transit to reach their destination.

4. **With or without a Places29 Master Plan, there is a backlog of needed transportation improvements** due to growth that has occurred and can be anticipated based on existing plans and project approvals. However, development in accordance with the Plan’s coordination of land uses and transportation may ultimately allow some of the road improvements to be postponed or even avoided.

5. **Future needs for schools, libraries, parks, and other community facilities have been included** in the Master Plan.

6. **The Master Plan preserves open space, provides connections to existing County parks, and encourages provision of amenities** in Centers and Neighborhoods.

7. **The Places29 Master Plan is a Vision Plan.** The Plan’s Future Land Use Map shows the community’s ultimate future vision for the area. It will be decades before the area is completely built out and fulfills the vision. Every five years, the County will review and update the Master Plan to revalidate the vision, see how far we’ve come, and determine what else needs to be included in the implementation program.

8. **The list of implementation projects in the Master Plan lays out the initial steps necessary to move towards the ultimate vision.** These implementation initiatives are

September 8 and 10 Public open houses
October Planning Commission Public Hearing on Places29
November Planning Commission recommendation to the Board of Supervisors

After the Planning Commission makes a recommendation on the Places29 Master Plan, the Plan is forwarded to the Board of Supervisors for consideration.

*Watch for future A-mails about specific dates, times, and places for these next steps.*
The Places29 Master Plan: Ten Important Facts

1. **Places29 is one of five master plans for the County’s Development Areas.** It covers the four urban areas along US 29 that are north of the City of Charlottesville: Neighborhood 1, Neighborhood 2, the Community of Hollymead, and the Community of Piney Mountain. The Plan recognizes that almost one-quarter of the County’s residents live in this area, and it is one of the County’s main commercial, retail, and employment areas.

2. Based on existing development and expected future growth, **the Plan coordinates land use and transportation** so that homes and businesses are well-served by roads, transit, and community facilities. The Plan also establishes priorities for the location of public investments and to guide land use decisionmaking.

3. **Places29 recommends a comprehensive, regional, multimodal transportation network.** The network includes improvements on US 29, grade-separated intersections that minimize ramps, and a system of roads that are parallel and perpendicular to US 29. The parallel and perpendicular roads will give local traffic a choice of routes—all trips won’t have to be on US 29. Offering local traffic alternative routes will make it easier for regional traffic to move through the US 29 Corridor more quickly and safely. The transportation network is also multimodal, which means that people will have a choice of driving, walking, bicycling, or using transit to reach their destination.

4. **With or without a Places29 Master Plan, there is a backlog of needed transportation improvements** due to growth that has occurred and can be anticipated based on existing plans and project approvals. However, development in accordance with the Plan’s coordination of land uses and transportation may ultimately allow some of the road improvements to be postponed or even avoided.

5. **Future needs for schools, libraries, parks, and other community facilities have been included** in the Master Plan.

6. **The Master Plan preserves open space, provides connections to existing County parks, and encourages provision of amenities** in Centers and Neighborhoods.

7. **The Places29 Master Plan is a Vision Plan.** The Plan’s Future Land Use Map shows the community’s ultimate future vision for the area. It will be decades before the area is completely built out and fulfills the vision. Every five years, the County will review and update the Master Plan to revalidate the vision, see how far we’ve come, and determine what else needs to be included in the implementation program.

8. **The list of implementation projects in the Master Plan lays out the initial steps necessary to move towards the ultimate vision.** These implementation initiatives are
planned to take place over the next 20 years, although economic and funding conditions may affect the timing. But even if the transportation improvements and other community facilities are limited, delayed, or not constructed, the Places29 area will still benefit from development of the pattern of mixed land uses, walkable neighborhoods, and transportation options recommended in the Plan.

9. **While road improvements and the access management program may change the way some properties are accessed, Places29 calls for minimal disruption of existing businesses**, provides opportunities for redevelopment as property owners feel market conditions warrant, and increases business vitality by improving access for vehicles, pedestrians, bicyclists, and transit riders.

10. It is important to recognize that **this Master Plan does not change the zoning of property**. Individual properties continue to be regulated under the zoning that exists on their property. The Master Plan does provide policy direction should changes to current zoning be sought and general guidance for future development.

**Copies of the draft Places29 Master Plan are available for review at:**
- The Northside Library—ask at the reference desk
- The Community Development Lobby in the County Office Building

The Plan is also on the County’s Places29 website: [www.albemarle.org/places29](http://www.albemarle.org/places29)

A limited number of paper copies of the Plan are available for $56.00 (necessary to cover the costs of copying), please call the Community Development Dept. at (434) 296-5832 and ask the receptionist about a copy.

CDs with the complete Plan are available at no charge. Contact the receptionist as for a hard copy.

For questions or further information about the Master Plan, please contact:
Judy Wiegand, (434) 296-5832, x. 3438 or jwiegand@albemarle.org

**To sign up for Places29 e-news from A-mail:** [www.albemarle.org/amail](http://www.albemarle.org/amail)

**Next Steps:**
- **September 8 and 10** — Public open houses
- **October** — Planning Commission Public Hearing on Places29
- **November** — Planning Commission recommendation to the Board of Supervisors

After the Planning Commission makes a recommendation on the Places29 Master Plan, the Plan is forwarded to the Board of Supervisors for consideration.

**Watch for future A-mails about specific dates, times, and places for these next steps.**
The Places29 Master Plan: Ten Important Facts

1. **Places29 is one of five master plans for the County’s Development Areas.** It covers the four urban areas along US 29 that are north of the City of Charlottesville: Neighborhood 1, Neighborhood 2, the Community of Hollymead, and the Community of Piney Mountain. The Plan recognizes that almost one-quarter of the County’s residents live in this area, and it is one of the County’s main commercial, retail, and employment areas.

2. Based on existing development and expected future growth, **the Plan coordinates land use and transportation** so that homes and businesses are well-served by roads, transit, and community facilities. The Plan also establishes priorities for the location of public investments and to guide land use decisionmaking.

3. **Places29 recommends a comprehensive, regional, multimodal transportation network.** The network includes improvements on US 29, grade-separated intersections that minimize ramps, and a system of roads that are parallel and perpendicular to US 29. The parallel and perpendicular roads will give local traffic a choice of routes—all trips won’t have to be on US 29. Offering local traffic alternative routes will make it easier for regional traffic to move through the US 29 Corridor more quickly and safely. The transportation network is also multimodal, which means that people will have a choice of driving, walking, bicycling, or using transit to reach their destination.

4. **With or without a Places29 Master Plan, there is a backlog of needed transportation improvements** due to growth that has occurred and can be anticipated based on existing plans and project approvals. However, development in accordance with the Plan’s coordination of land uses and transportation may ultimately allow some of the road improvements to be postponed or even avoided.

5. **Future needs for schools, libraries, parks, and other community facilities have been included** in the Master Plan.

6. **The Master Plan preserves open space, provides connections to existing County parks, and encourages provision of amenities** in Centers and Neighborhoods.

7. **The Places29 Master Plan is a Vision Plan.** The Plan’s Future Land Use Map shows the community’s ultimate future vision for the area. It will be decades before the area is completely built out and fulfills the vision. Every five years, the County will review and update the Master Plan to revalidate the vision, see how far we’ve come, and determine what else needs to be included in the implementation program.

The Places29 Master Plan: Ten Important Facts

1. **Places29 is one of five master plans for the County’s Development Areas.** It covers the four urban areas along US 29 that are north of the City of Charlottesville: Neighborhood 1, Neighborhood 2, the Community of Hollymead, and the Community of Piney Mountain. The Plan recognizes that almost one-quarter of the County’s residents live in this area, and it is one of the County’s main commercial, retail, and employment areas.

2. Based on existing development and expected future growth, **the Plan coordinates land use and transportation** so that homes and businesses are well-served by roads, transit, and community facilities. The Plan also establishes priorities for the location of public investments and to guide land use decisionmaking.

3. **Places29 recommends a comprehensive, regional, multimodal transportation network.** The network includes improvements on US 29, grade-separated intersections that minimize ramps, and a system of roads that are parallel and perpendicular to US 29. The parallel and perpendicular roads will give local traffic a choice of routes—all trips won’t have to be on US 29. Offering local traffic alternative routes will make it easier for regional traffic to move through the US 29 Corridor more quickly and safely. The transportation network is also multimodal, which means that people will have a choice of driving, walking, bicycling, or using transit to reach their destination.

4. **With or without a Places29 Master Plan, there is a backlog of needed transportation improvements** due to growth that has occurred and can be anticipated based on existing plans and project approvals. However, development in accordance with the Plan’s coordination of land uses and transportation may ultimately allow some of the road improvements to be postponed or even avoided.

5. **Future needs for schools, libraries, parks, and other community facilities have been included** in the Master Plan.

6. **The Master Plan preserves open space, provides connections to existing County parks, and encourages provision of amenities** in Centers and Neighborhoods.

7. **The Places29 Master Plan is a Vision Plan.** The Plan’s Future Land Use Map shows the community’s ultimate future vision for the area. It will be decades before the area is completely built out and fulfills the vision. Every five years, the County will review and update the Master Plan to revalidate the vision, see how far we’ve come, and determine what else needs to be included in the implementation program.

8. **The list of implementation projects in the Master Plan lays out the initial steps necessary to move towards the ultimate vision.** These implementation initiatives are
planned to take place over the next 20 years, although economic and funding conditions may affect the timing. But even if the transportation improvements and other community facilities are limited, delayed, or not constructed, the Places29 area will still benefit from development of the pattern of mixed land uses, walkable neighborhoods, and transportation options recommended in the Plan.

9. While road improvements and the access management program may change the way some properties are accessed, Places29 calls for minimal disruption of existing businesses, provides opportunities for redevelopment as property owners feel market conditions warrant, and increases business vitality by improving access for vehicles, pedestrians, bicyclists, and transit riders.

10. It is important to recognize that this Master Plan does not change the zoning of property. Individual properties continue to be regulated under the zoning that exists on their property. The Master Plan does provide policy direction should changes to current zoning be sought and general guidance for future development.

Copies of the draft Places29 Master Plan are available for review at:
- The Northside Library—ask at the reference desk
- The Community Development Lobby in the County Office Building

The Plan is also on the County’s Places29 website: www.albemarle.org/places29

A limited number of paper copies of the Plan are available for $56.00 (necessary to cover the costs of copying), please call the Community Development Dept. at (434) 296-5832 and ask the receptionist about a copy.

CDs with the complete Plan are available at no charge. Contact the receptionist as for a hard copy.

For questions or further information about the Master Plan, please contact:
Judy Wiegand, (434) 296-5832, x. 3438 or jwiegand@albemarle.org

To sign up for Places29 e-news from A-mail: www.albemarle.org/amail

Next Steps:
- September 8 and 10 Public open houses
- October Planning Commission Public Hearing on Places29
- November Planning Commission recommendation to the Board of Supervisors

After the Planning Commission makes a recommendation on the Places29 Master Plan, the Plan is forwarded to the Board of Supervisors for consideration.

Watch for future A-mails about specific dates, times, and places for these next steps.
The Places29 Master Plan: Ten Important Facts

1. **Places29 is one of five master plans for the County’s Development Areas.** It covers the four urban areas along US 29 that are north of the City of Charlottesville: Neighborhood 1, Neighborhood 2, the Community of Hollymead, and the Community of Piney Mountain. The Plan recognizes that almost one-quarter of the County’s residents live in this area, and it is one of the County’s main commercial, retail, and employment areas.

2. Based on existing development and expected future growth, **the Plan coordinates land use and transportation** so that homes and businesses are well-served by roads, transit, and community facilities. The Plan also establishes priorities for the location of public investments and to guide land use decisionmaking.

3. **Places29 recommends a comprehensive, regional, multimodal transportation network.** The network includes improvements on US 29, grade-separated intersections that minimize ramps, and a system of roads that are parallel and perpendicular to US 29. The parallel and perpendicular roads will give local traffic a choice of routes—all trips won’t have to be on US 29. Offering local traffic alternative routes will make it easier for regional traffic to move through the US 29 Corridor more quickly and safely. The transportation network is also multimodal, which means that people will have a choice of driving, walking, bicycling, or using transit to reach their destination.

4. **With or without a Places29 Master Plan, there is a backlog of needed transportation improvements** due to growth that has occurred and can be anticipated based on existing plans and project approvals. However, development in accordance with the Plan’s coordination of land uses and transportation may ultimately allow some of the road improvements to be postponed or even avoided.

5. **Future needs for schools, libraries, parks, and other community facilities have been included** in the Master Plan.

6. **The Master Plan preserves open space, provides connections to existing County parks, and encourages provision of amenities** in Centers and Neighborhoods.

7. **The Places29 Master Plan is a Vision Plan.** The Plan’s Future Land Use Map shows the community’s ultimate future vision for the area. It will be decades before the area is completely built out and fulfills the vision. Every five years, the County will review and update the Master Plan to revalidate the vision, see how far we’ve come, and determine what else needs to be included in the implementation program.

Every five years, the County will review and update the Master Plan to revalidate the vision, see how far we’ve come, and determine what else needs to be included in the implementation program.

8. **The list of implementation projects in the Master Plan lays out the initial steps necessary to move towards the ultimate vision.** These implementation initiatives are
planned to take place over the next 20 years, although economic and funding conditions may affect the timing. But even if the transportation improvements and other community facilities are limited, delayed, or not constructed, the Places29 area will still benefit from development of the pattern of mixed land uses, walkable neighborhoods, and transportation options recommended in the Plan.

9. **While road improvements and the access management program may change the way some properties are accessed, Places29 calls for minimal disruption of existing businesses**, provides opportunities for redevelopment as property owners feel market conditions warrant, and increases business vitality by improving access for vehicles, pedestrians, bicyclists, and transit riders.

10. It is important to recognize that **this Master Plan does not change the zoning of property**. Individual properties continue to be regulated under the zoning that exists on their property. The Master Plan does provide policy direction should changes to current zoning be sought and general guidance for future development.

**Copies of the draft Places29 Master Plan are available for review at:**

- The Northside Library—as at the reference desk
- The Community Development Lobby in the County Office Building

The Plan is also on the County’s Places29 website: [www.albemarle.org/places29](http://www.albemarle.org/places29)

A limited number of paper copies of the Plan are available for $56.00 (necessary to cover the costs of copying), please call the Community Development Dept. at (434) 296-5832 and ask the receptionist about a copy.

CDs with the complete Plan are available at no charge. Contact the receptionist as for a hard copy.

For questions or further information about the Master Plan, please contact:

Judy Wiegand, (434) 296-5832, x. 3438 or jwiegand@albemarle.org

**To sign up for Places29 e-news from A-mail:** [www.albemarle.org/amail](http://www.albemarle.org/amail)

**Next Steps:**

- **September 8 and 10**  Public open houses
- **October**  Planning Commission Public Hearing on Places29
- **November**  Planning Commission recommendation to the Board of Supervisors

After the Planning Commission makes a recommendation on the Places29 Master Plan, the Plan is forwarded to the Board of Supervisors for consideration.

**Watch for future A-mails about specific dates, times, and places for these next steps.**
The Places29 Master Plan: Ten Important Facts

1. **Places29 is one of five master plans for the County’s Development Areas.** It covers the four urban areas along US 29 that are north of the City of Charlottesville: Neighborhood 1, Neighborhood 2, the Community of Hollymead, and the Community of Piney Mountain. The Plan recognizes that almost one-quarter of the County’s residents live in this area, and it is one of the County’s main commercial, retail, and employment areas.

2. Based on existing development and expected future growth, **the Plan coordinates land use and transportation** so that homes and businesses are well-served by roads, transit, and community facilities. The Plan also establishes priorities for the location of public investments and to guide land use decisionmaking.

3. **Places29 recommends a comprehensive, regional, multimodal transportation network.** The network includes improvements on US 29, grade-separated intersections that minimize ramps, and a system of roads that are parallel and perpendicular to US 29. The parallel and perpendicular roads will give local traffic a choice of routes—all trips won’t have to be on US 29. Offering local traffic alternative routes will make it easier for regional traffic to move through the US 29 Corridor more quickly and safely. The transportation network is also multimodal, which means that people will have a choice of driving, walking, bicycling, or using transit to reach their destination.

4. **With or without a Places29 Master Plan, there is a backlog of needed transportation improvements** due to growth that has occurred and can be anticipated based on existing plans and project approvals. However, development in accordance with the Plan’s coordination of land uses and transportation may ultimately allow some of the road improvements to be postponed or even avoided.

5. **Future needs for schools, libraries, parks, and other community facilities have been included** in the Master Plan.

6. **The Master Plan preserves open space, provides connections to existing County parks, and encourages provision of amenities** in Centers and Neighborhoods.

7. **The Places29 Master Plan is a Vision Plan.** The Plan’s Future Land Use Map shows the community’s ultimate future vision for the area. It will be decades before the area is completely built out and fulfills the vision. Every five years, the County will review and update the Master Plan to revalidate the vision, see how far we’ve come, and determine what else needs to be included in the implementation program.

8. **The list of implementation projects in the Master Plan lays out the initial steps necessary to move towards the ultimate vision.** These implementation initiatives are
planned to take place over the next 20 years, although economic and funding conditions may affect the timing.
