The Places29 Development Areas

The Places29 Master Plan covers the four Development Areas north of the City of Charlottesville: Neighborhood 1, Neighborhood 2, the Community of Hollymead, and the Community of Piney Mountain—almost 14.5 square miles. When approved by the Board of Supervisors, this master plan will be part of the Land Use section of the County’s Comprehensive Plan. The Comprehensive Plan is advisory in nature and is intended as a general guide for future development and change in the County.

The Vision for the Places29 Draft Master Plan

Albemarle County’s four Northern Development Areas will feature compact development consisting of residential and employment neighborhoods that are organized around centers. These neighborhoods and their centers will be pedestrian-oriented and mixed-use; they will offer a variety of housing choices, retail environments, office types, and employment opportunities. They will be connected by an attractive, efficient, and accessible multimodal transportation system. Integrated into this urban-style development, parks and open spaces will provide a sense of respite and contribute to an overall excellent quality of life.

The Guiding Principles for the Places29 Draft Master Plan

Development ● Transportation ● Open Space and Community Facilities & Amenities

Development

1. As stated in the Comprehensive Plan, the County has chosen to direct future development into the Development Areas in order to lessen development pressure on the Rural Areas. New development in the four Northern Development Areas is intended to follow the Neighborhood Model, so that those areas will include lively, mixed-use, pedestrian-friendly centers.
2. The four Northern Development Areas form a corridor centered on US 29 North. As development in the corridor and elsewhere increases, the additional traffic it generates must be addressed by this Master Plan.
3. By improving on the current configuration of neighborhoods, places of employment, and shopping areas, the community seeks to create a pattern of walkable places with a diverse range of uses. Transit, pedestrian, and bicycle connections and facilities should improve access and ensure safety.
4. The Master Plan recognizes the need for land and infrastructure to accommodate sustainable levels of business and industry.
5. The Northern Development Areas can expect a combination of new development, infill development, and redevelopment to take place subject to this Master Plan. It is essential for this development to follow the principles of the County’s Neighborhood Model; to respect and work with the terrain.
6. Preserving the character of existing neighborhoods while improving the quality, diversity, and affordability of new housing is important. Housing, including workforce housing located close to employment centers, shopping areas, transportation, and recreation is important for the Northern Development Areas.
7. The community of the Northern Development Areas values creative, effective design, which respects the scale and character of existing development and adjacent planned open space.
8. It is important to provide infrastructure at or before the time it is needed to serve new development. Infrastructure may be funded by local government, the private sector, or a combination of funding sources.

What are the Guiding Principles?

The Guiding Principles were developed based on community input early in the planning process, and they were consistently referenced throughout the building of the draft Plan. These principles represent the fundamental aspirations of residents for their own community. They serve as the basis for both the physical and policy aspects of the plan.

Open Space and Community Facilities & Amenities

13. The community values the expansive views of the Blue Ridge Mountains and other vistas; they add to the quality of life. They should be preserved through careful delineation and protection of viewsheds.

14. The community of the Northern Development Areas values a well-connected network of accessible public open spaces, greenways, and trails. This network will be created by preserving the existing open spaces and adding new ones, and by making connections between open spaces in the Development Areas, the surrounding Rural Areas, and the City of Charlottesville.

15. The County’s public facilities, such as libraries and schools, are both a source of pride and a resource. These facilities should be convenient and accessible to neighborhoods and employment centers.

The Neighborhood Model

Achieving Albemarle County’s dual goals of preserving its Rural Area and creating livable communities in its designated Development Areas requires a new form of development, referred to as the Neighborhood Model. The Neighborhood Model seeks to change the form of development from a pattern of sprawling, isolated buildings to a more compact and interconnected design. The overall goal for existing residential neighborhoods within the Places29 area is to protect and enhance them, with few exceptions. The Neighborhood Model is part of the County’s Comprehensive Plan.

12 Principles of the Neighborhood Model:

1. Pedestrian Orientation
2. Neighborhood Friendly Streets and Paths
3. Interconnected Streets and Transportation Networks
4. Parks and Open Space
5. Neighborhood Centers
6. Buildings and Spaces of Human Scale
7. Relegated Parking
8. Mixture of Uses
9. Mixture of Housing Types and Affordability
10. Redevelopment
11. Site Planning That Respects Terrain
12. Clear Boundaries with the Rural Areas
