

The ECC, highlighted in this month's addition of the "Above Ground Level" magazine with our Carter's Mountain Tower site being selected as the tower of the month for January 2013. Thanks to Gabe Elias for a beautiful photograph.

### about the center spread

**Charlottesville, Va.**

Located atop Carter Mountain and near Thomas Jefferson's Monticello, the AGL Tower of the Month was erected in 2004 by prime contractor Motorola. The public safety tower is part of a four-site, multijurisdictional, simulcast, trunked 800-MHz system that covers 740 square miles. It is part of a three-site, simulcast, UHF paging system for fire and EMS communications. The site also provides low-band VHF statewide conventional interoperability. It has a high-band VHF, UHF and 800-MHz national calling channel and tactical channel for mutual aid and interoperability in the public safety frequency bands.
